PRESS RELEASE

Ronald McDonald House Saskatchewan Receives Support from Deveraux Group of Companies' Towards Miles To Go Campaign.

The Deveraux Group of Companies' commitment to supporting the development of the Regina Ronald McDonald House through a substantial funding contribution of \$400,000 demonstrates their dedication to community welfare and corporate social responsibility. This initiative is particularly significant as it provides families with a safe and supportive environment while they navigate the challenges of their children's medical needs.

The new House in Regina will support a total of 824 families per year; 14M of the capital raise will contribute to the provincial expansion, in Regina.

As Dr. Denis Jones emphasized, the Deveraux team recognizes the importance of providing families with a secure and nurturing environment. This support can lead to better emotional and psychological outcomes for families during stressful periods.

Tammy Forrester highlights the importance of Deveraux Group of Companies' contribution:

"It is a huge gift for us to be supported by the Deveraux Group of Companies. Their contribution will be used towards millwork; creating a beautiful space for families to cook meals and spend time together, amidst challenging times."
